

BRUNO MAISIBA BOSIRE

Nairobi, Kenya | +254716981689 | maisibabruno@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Professional Summary

Detail-oriented and results-driven Data Analyst with a BSc in Computer Science and proven experience in extracting insights from data, developing predictive models, and building intuitive dashboards. Skilled in Python, SQL, Power BI, and Tableau. Adept at applying data science techniques to solve real-world business problems across sectors including solar energy, aviation, and cybersecurity. Passionate about driving decisions through data.

Education

2020-2024	BSc. Computer Science, 2nd Upper	Kabarak University
2016-2019	Kenya Certificate of Secondary Education (KCSE), B+	Kiage Tumaini High School

Certifications & Technical Training

- British Data Science (2025)
- Deloitte Data Analytics & Forensic Technology (2025)
- Excel (2025)
- DBT (2025)
- Cybersecurity & Incident Response Cisco & LinkedIn Learning (2025)
- Ethical Hacking Cisco (2024)
- CCNA Networking & System Security (2023)
- Python (2024)

Technical Skills

- Python, SQL, Excel: Data processing, analysis, and automation
- Power BI, Tableau: Dashboard development and data storytelling
- Predictive Modeling, Trend Analysis, Forecasting
- Data Cleaning, EDA (Exploratory Data Analysis), Feature Engineering
- Web Scraping, API Integration
- Git, Linux, Docker

Experience

Code Shop Technologies | Data Analyst | May 2023 - September 2023

- Led analysis of 10,000+ sales records leading to a 10% reduction in business losses.
- Developed predictive models using Python, achieving 85% forecasting accuracy.
- Created 5+ interactive dashboards with Power BI and Tableau, reducing reporting time by 20%.

- Conducted trend analysis on sales and performance data spanning a decade (2013–2023).
- Improved data collection processes, increasing accuracy by 15% and reducing processing time by 25%.

Projects

British Airways Customer Sentiment Analysis | January 2025

- Web scraped customer reviews and performed sentiment analysis using Python.
- Applied topic modeling to uncover common themes in feedback.
- Developed dashboard for senior management to inform service improvement strategies.

Aviation Safety Analysis System | July 2023

- Analyzed 5,000+ crash reports to identify safety trends.
- Created encrypted database and automated threat detection system.
- Ensured compliance with data privacy standards.

Daikibo Industrial Security Incident Analysis | March 2025

- Analyzed web logs and user patterns to detect unauthorized access.
- Reported breach findings that led to timely remediation.

Analysis of Kenya Airways Airline Reviews | March 2025

I performed the analysis in order to:

- Understand customer perception of Kenya Airways across different service dimensions
- Identify patterns in customer satisfaction based on variables like aircraft type, travel class, and traveler type
- Track changes in customer sentiment over time
- Map geographical differences in customer satisfaction
- Provide actionable insights for service improvement

Procurement KPI Analysis | June 2025

I performed the analysis in order to:

- Analyze supply chain bottlenecks
- Engineer procurement KPIs
- Predict savings using ML models
- Rank suppliers by reliability
- Uncover hidden cost optimization opportunities

IoT Smart Water System Security & System Monitoring | Jan 2024 – April 2024

- Designed secure IoT system reducing water wastage by 30%
- Installed and maintained sensor networks; monitored system performance and access control

- Conducted system diagnostics and penetration testing to ensure reliability and security

Security Log Monitoring Platform | Dec 2024

- Built automated log analysis system to monitor system logs in real-time Built automated log analysis system to monitor system logs in real-time
- Designed dashboards to visualize alerts and system events Designed dashboards to visualize alerts and system events
- Reduced false-positive alerts by 40% and improved response time by 60%Reduced false-positive alerts by 40% and improved response time by 60%

Cisco Hardware Labs (Training-Based) | Dec 2024 – Feb 2025

- Assembled and configured desktop and laptop hardware Assembled and configured desktop and laptop hardware
- Installed and configured operating systems and software packages Installed and configured operating systems and software packages
- Diagnosed and repaired faults in ICT hardware and peripherals Diagnosed and repaired faults in ICT hardware and peripherals
